3.1	Restriction bloc editor	3
3.2	Networking.....	3

1 New features

1.1 Back to event button

Adding a new button “Events home” to redirect from a replay to the event home page if there is an active event phase. Otherwise, it redirects to the event channel home.

2 Changes

2.1 Soft delete of a media channel

The delete of a media channel do not drop the data in database. Instead, it changes a status flag to be delete through a periodic automatic task.

2.2 Adding more admin logs

Adding logs for the following actions:

- [Web pages](#) – Tracking sections updates
- [Event Channel](#) – Tracking program synchronization updates
- [Authentication provider](#) – Tracking authentication creations, updates and deletes.

2.3 Adding more fields in statistic exports

In the statistics export feature, adding the possibility to add custom fields to the spreadsheets. It adds specifically the ERS contact ID.

2.4 Removing the e-learning link

[#ERSHD-858](#)

Removing the e-learning link from the meta navigation bar on mobile and desktop applications.

3 Bugs fixing

3.1 Restriction bloc editor

Fix in the restriction bloc editor.

- Text colors did not apply correctly.
- Images did not align correctly.

3.2 Networking

Fix a bug in the networking box opened from the program modal.
